

Maple Leaf Press NFAA Official Animal Targets with NFAA Optional Bonus Point Labels (Spots)

Maple Leaf Press is proud of the 2002 full color NFAA Official Animal Target line. The realistic animals have the IFAA approved kill allowing them to be used at any NFAA or IFAA event. The 2002 version includes a higher visibility kill line. All targets are printed on 100# Tag and have Mix and Match Pricing. All targets have UPC codes for your convenience. At the 2003 Directors meeting, it was approved to have an optional Bonus Point Label (Spot) for animal targets. The "Sticky Spot" will be used for National and Sectionals, but is elective for State and Local Tournaments. Bonus Point labels can not be used at IFAA tournaments because they do not allow any aiming spots for animals. The Spots are Black or White and come in four different sizes. The spots get smaller as the targets gets smaller. This indicator sheet shows what targets get which color spot. A template set is also available to help locate the position of the spots. "X" indicates Black Spots.

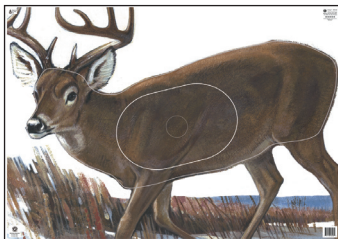

GROUP 1 28" x 40" NFAA Official Targets
