## NASP Program Target Faces

When national NASP officials wanted an accurate, easy to score target they turned to Maple Leaf Press. The result was the NASP-80. We added scoring numbers from 1 to 10 on all 4 diagonals from the center out making it easy to score for even the youngest archer. Scoring numbers have been kept small and screened to keep them from becoming a distraction for the archer. Even though our face has been copied by other manufacturers, Maple Leaf Press is proud to have designed the face and of their relationship with NASP. Part of the cost on each target sold with the NASP logo goes back to support the program through discounts and donations to NASP programs.
